

LOCAL NEWS

MORRISVILLE

F. G. Fleetwood was in Boston a few days recently on professional business.

W. C. Ward was the guest of his sister, Mrs. Delbert Warren, in Hardwick last Friday.

Miss Pluma Darling has been ill and confined to her home on Elmore street for some time.

Mr. and Mrs. M. B. White and son were in Barre Sunday, making the trip by automobile.

Mrs. F. B. Morse returned last Thursday from a several days' visit with her friends in Burlington.

Walter A. Honsinger of St. Albans was a guest the past week of his cousins, Mr. and Mrs. D. W. Donaldson.

Mr. and Mrs. W. C. Ward were guests last week at the home of Mr. and Mrs. George C. Bryant in Elmore.

Charles Bixby and family returned last Thursday from a several days' visit with relatives in Barre and vicinity.

George Crowell of Manchester, N. H., has been a recent guest of his brother and wife, Mr. and Mrs. Edward Crowell.

Mrs. George Cook and daughter, Drena, of Hardwick have been recent guests of the former's sister and husband, Mr. and Mrs. Allen B. Small, on the Randolph road.

Miss Florence Boyce, who has been confined to the house for eight weeks suffering from rheumatism, has been confined to the bed for nearly three weeks by heart trouble.

Among the many signs of approaching spring-time, Mrs. Thomas Gerry, who resides above Morrismont Plains, reports the discovery of a brown butterfly in her home last Friday.

Mrs. R. E. Barrows entertained several ladies at her home at a five o'clock tea last Saturday afternoon in honor of the 84th birthday anniversary of her aunt, Mrs. Esther A. Blakely, of Westfield, Wis., who is spending the winter with her. Several nieces and grandnieces were present. Mrs. Blakely is enjoying excellent health and enjoyed the occasion greatly, as did the guests.

The Busy Bee class of the Methodist church, taught by Mrs. C. B. Story, gave a social at the church vestry last Friday evening, which was attended and greatly enjoyed by about 60 little people. The following program was given:—Recitation, Elsie Bowen; instrumental duet, Faith Edmunds and Gladys O'Neil; talk about China, Mrs. Story; duet, Evelyn Camp and Dolly Magooa. Other enjoyable features included marching and games. Refreshments of punch and wafers were served.

Death of Mrs. Francis Young

Mrs. Francis Young, an old resident of Morrisville, died at her late home on Bridge street last Friday night at about 9 o'clock, after a long period of ill health, although she had been confined to her bed only since Saturday of the previous week. Funeral services were held Monday at 9 o'clock a. m. from the Catholic church on Brooklyn street and interment was in the Catholic cemetery at Hyde Park. Rev. Fr. Crosby of Hardwick officiated. The immediate cause of death was a fall received several days before in the kitchen.

The deceased was 82 years of age the 10th day of last June. Her maiden name was Miss Julia Burnor. She was united in marriage to Francis Young in Pittsford, Vt., 60 years ago the 3d day of next month. After residing in New York State and Canada, and Johnson four years, they came to Morrisville about 1872, and have lived in this vicinity practically all of the time since. Of several children born to them, only two survive, Mrs. Mary Farnham, who came here from Bath, N. H., to care for her mother several weeks ago, and Mrs. Julia Shantelle, widow of the late Charles Shantelle, who lives in Minnesota. Late news from the latter stated that she was very ill and not expected to live. These two and the aged husband, who is 84 years of age, are the only known survivors of the immediate family.

Mrs. Young was a hardworking, kind-hearted woman, who had the respect and esteem of all who knew her.

An Educational Triumph

While he was in North Dakota, last year, Leonard T. Cole received a telegram offering him a better superintendency in South Dakota, upon which he entered last September.

Having written the required several educational theses, having passed rigid examinations and having given evidence of extensive, successful experience, besides presenting his academic and normal school credentials and his three college diplomas, a life diploma, dated March 1, 1915, was granted to Mr. Cole.

This life diploma not only licenses the holder to teach and superintend any public schools of South Dakota and to conduct teachers' institutes there, but because of its high rank above other State certificates, seventeen commonwealths of the United States, and several British provinces will endorse it without examination or question.

In issuing this license, Hon. C. H. Lugg, State Superintendent of Public Instruction, wrote thus to Mr. Cole:—"Let me congratulate you upon this evidence of your long and efficient educational service and devotion to study. May success attend you in your work under this credential."

WHEN RUN DOWN

Hood's Sarsaparilla, the Reliable Tonic Medicine, Builds Up.

The reason why you feel so tired all the time at this season is that your blood is impure and impoverished. It lacks vitality. It is not the rich, red blood that gives life to the whole body, perfects digestion and enables all the organs to perform their functions as they should.

From any druggist get Hood's Sarsaparilla. It will make you feel better, look better, eat and sleep better. It is the old reliable tried and true all-the-year-round blood purifier and enricher, tonic and appetizer. It revitalizes the blood, and is especially useful in building up the debilitated and run-down.

Hood's Sarsaparilla is helping thousands at this time of year. Let it help you. Get a bottle today and begin taking it at once. Be sure to get Hood's.

The Runaways

The matrimonial affairs of a young couple, the amorous tendencies of wealthy bachelor and the discouraging attitude of the object of his affection, the musical ambitions of a maid-of-all-work, the troubles of a runaway couple with a broken-down automobile, the mystery of a diamond robbery and the conscientious but unsuccessful attempts of an officer of the law to discharge his duty all go to make up the plot of "The Runaways," the comedy which will be presented at the town hall on March 25th and 26th by the Unity Class of the Congregational church under the direction of Prof. R. G. Reynolds. The cast follows:—

Jean McLean, Little Miss Fitt, Helen D. Robinson, Mrs. Juniper, a Young Wife, Lela Nay Victoria, the Girl in the Taxi, Nan M. Wombell, Texana, the Girl of the Golden West, Eugene Pinney, Max Juniper, the Perplexed Husband, H. A. Smalley, Alonzo Willing, the Fortune Hunter, Fred Child, Jr., Sheriff Jim Larrabee, Officer 666, M. B. White

Seats on sale at Cheney's.

Vermont Engineers Meet

Superintendent C. A. Slayton of the Morrisville Electric Light Department, was in Burlington last Thursday to attend a meeting of the Vermont Society of Engineers, who held their third annual meeting at Hotel Vermont. Dinner was taken by the engineers together in the hotel dining room and following that the public meeting was held in the roof garden. The addresses of both James Hartness, past president of the American Society of Mechanical Engineers, who spoke on "Vermont and the Engineer" and David Williams of St. Johnsbury, who gave the president's address on "The Influence of the Engineer in the Development of the Country Through Railroad Construction and Operation," were free from technicalities and were of interest to the laymen who attended. There were about 75 engineers present.

The Value of Advertising

"Who pays the cost of advertising?" "Five years ago a certain automobile manufacturer's output was a few thousand cars which he sold for about one thousand dollars each."

"During the present season he is building more than two hundred thousand cars which are vastly better than the former output, and his price for them is less than five hundred dollars each."

"Extensive advertising has brought this vast number of buyers, thus enabling him to equip an enormous factory where cars in such large numbers can be turned out much more cheaply."

"The same condition is found in practically all lines of business. Advertising reduces the cost to the consumer and improves the quality because of the large volume of sales it brings."

"In buying advertised goods you not only get the best value for the money, but a reliable manufacturer's guarantee of 'satisfaction or money refunded.'"—Farm and Fireside.

Big Yield of Oats and Barley

Vermont has a tremendous crop of oats stored on her farms, according to a bulletin issued by the National Bureau of Crop Estimates. It figures up 1,700,000 bushels, for which the price to producers is 60 cents, as compared with 50 cents last year. Last year the crop was only 1,178,000 bushels and the average for five years is 1,061,000.

In corn the figures are not so large. The quantity now on hand is 423,000 bushels, as against 408,000 in 1914. But the five-year average is 582,000.

The Warner Sap Bucket

is the heaviest bucket made, size 15 quarts, no bucket weighs less than 3 pounds. If your dealer has not got them write us for prices. Geo. D. Jarvis & Co., Burlington, Vt.—adv.

Camps New and Old.

At an auction sale in New York city recently an oriental rug sold for \$2,700; it was bought for a "private camp." Shades of Kit Carson, Davy Crockett and other pioneers in camp life will please take notice and reflect on the change in standards since "roughing it" first became popular.

RUTLAND FARMERS ALIVE

Have Had Soils Tested and Will Grow a New Crop

Scientific farming will be carried out to quite an extent this spring and summer by the farmers in Rutland County, according to Henry Jennings, agent of the Rutland County Farm Bureau. Over 500 tests of soil from different farms in that vicinity have been made during the last year, and this gives the farmers a sound basis on which to begin operations. These tests show the farmer the requirements of the soil on different sections of his farm.

In a majority of cases it developed there was a demand for sweetening in the soils in order to grow clover successfully. This applies, almost without exception to the upland soils of the county. The tests also indicated that over a ton, and a half of ground limestone or its equivalent was required to each acre of ground on the average farm in order to produce good results. This the bureau has succeeded in getting at reduced figures.

The County Farm Bureau is interested in another and very important crop, the soy bean, which has been very successfully tried out in this vicinity, especially when grown with ensilage corn, where it acts as a fertilizer and is also a valuable asset as a food product, not only for cattle but people.

Mr. Jennings stated that he had every reason to believe that a large number of the farmers in the county were planning to take up the cultivation of this bean.

Mr. Jennings said: "In selecting seed for this crop it is recommended that varieties which will grow to a height of from three to five feet be chosen as it is believed that larger yields of fodder will be secured in this way. Varieties which have succeeded in this county during the past season are the mammoth yellow or guelph, either of which gave good yields. 'The planting is done by mixing the soy seed with the corn and planting an increased amount of seed so as to apply at the rate of from four to six quarts of the soy beans per acre."

"One warning which should be sounded is the danger of getting a mechanical separation of soy bean seed and corn which is due to the jar which occurs in the seed hopper when the seed is planted. In order to avoid this it is desirable to place but a relatively small quantity of seeds in the planter hopper at one time."

The cost of soy beans is from \$2.50 to \$3.50 a bushel which makes the cost of the soy bean crop comparatively small considering the value of the crop. Planting and cultivation of this crop incurs no additional labor. The value of the crop is derived from two sources, first, the plant has a higher food value than the same dry weight of corn ensilage; second, because the soy bean belongs to the family of plants which can obtain a considerable amount of the nitrogen they use from the atmosphere and this assists in enriching the soil where it grows. This also assists materially in maintaining the fertility of the soil.

In answer to the question often asked as to whether the soy bean will not twine about the corn and choke its growth, it has been found from actual experience that the plant is an erect upright grower and produces no twining tendrils which cling to anything. This results in no trouble from the addition of this crop to the growing corn but means the addition of a good quantity of feed to the ensilage, which in turn means a lessening of the dairyman's feed bill because of producing a larger amount of food on the home farm.

Rheumatism Has a Foe

Only those who have suffered the agonizing pains of rheumatism recognize the value of a remedy which gives relief. Rheumatism has met a foe in SLOAN'S LINIMENT. Its attacking qualities send the warm, red blood to the painful or congested part, bringing quick relief.

SLOAN'S LINIMENT penetrates the painful parts without tiresome rubbing. This most satisfactory and vouchered for remedy has its further uses in all allied troubles, as bruises, swellings, or in fact anything which requires a good liniment.

A medicine chest is hardly complete without a remedy which can cover every emergency. So, when suffering from rheumatism and other pains, remember that SLOAN'S LINIMENT penetrates directly to the painful spot and kills the pain. Adv.

Vt. Stone Industry Figures

Not less than \$12,000,000 worth of marble, granite and slate are sold each year in this state and not less than \$68,000,000 are invested in the business in Vermont, according to the annual report of Prof. G. H. Perkins of Burlington, state geologist. Vermont is regarded all over the country as pre-eminently an agricultural state but the capital invested in stone industries and the product of quarries are nearly one-half as much as the value of all the farms in the state and the farm products sold.

Our Jewelry Stock

Is not as large as some, but everything in it is selected carefully and with a view of giving our customers good value and up-to-date goods.

Our Optical Department is at your service.

Picking Up Knowledge by the Way

By ORISON SWETT MARDEN.

(Copyright, McClure Newspaper Syndicate.)

I often receive letters from young people, complaining that it is impossible for them to attend school or college because they have to work, and therefore have no opportunity to acquire an education.

Did you ever stop to think, my young complaining friends, that a great many of the most prominent men of today have been self-educated? I do not mean that they have worked their way through school or college, but that they have actually gained an education in its widest and best sense by their own efforts, with little or no actual schooling.

Thomas A. Edison had only a few months' regular schooling for his parents were poor, and at twelve years of age he had to earn his own living. But he began reading "solid books" very early. When only ten he was absorbed in Gibbons' "Rome" and Hume's "England," and had already read the biographies of many great and noble men.

Andrew Carnegie had only an elementary school education, but by reading and studying in his leisure moments he acquired the culture that has fruited in several books and many magazine articles on topics of world-wide interest, to say nothing of his business achievements.

Prof. William J. McGee, who recently left the United States bureau of geology after remarkable geologic and ethnological achievements, was a blacksmith in Iowa when he began to study geology, the higher mathematics and languages. He was chief of the department of ethnology at the Louisiana Purchase exposition. He is now editor of the National Geographical Magazine.

You who complain that you have no opportunity to get an education, read the lives of men who have lifted themselves into place and power by self-education, biographies like that of Franklin, of Lincoln, of Vice-President Marshall, men who from the direst poverty, by sheer force of their own will power, have lifted themselves into the highest stations of life.

Did it ever occur to you that you are right now in the greatest of all universities, the university of life, where you are meeting people every day from whom you can learn something valuable, no matter how humble they may be?

If you are ambitious you can absorb knowledge every moment of your life; every piece of work you do, every human being you meet is a study for you.

If the young people who long for knowledge and think they are deprived of it because of their unfortunate position as wage-earners could only realize what a marvelous opportunity is theirs to drink in wisdom at every breath, to absorb invaluable knowledge through their very pores. The results of all the schools, of all the colleges and universities of the past are spread out here before our eyes in the civilization that now is. There never was such a time for gaining an education as the present.

To the busy worker our free public libraries, art galleries and museums, which are now opening their doors to evening visitors, offer splendid advantage for picking up knowledge.

The greatest characters in history have been noted for their perpetual self-improvement habits; they were always absorbing knowledge, power, from their experiences and surroundings, treasuring up gems of thought, valuable deductions.

It does not matter what your occupation may be, determine that every day, no matter how busy you may be, you will add a little something to your general improvement, you will absorb something that will make you a little larger, fuller, broader man or woman. Keep your eyes and ears and your mind open and you will be astonished at the number of useful things you will learn every day.

If you want to improve yourself form the habit of carrying a pad or notebook and pencil and jot down things you would like to be able to remember. You will be surprised to see how much you will gain in this way in a single year.

It is astonishing what the passion for self-improvement, the determination to get an education, will do for one in the course of a few years.

Oldest Old Oaken Bucket.

Gardens in Palestine are found mainly in the environs of the larger towns and owe their existence to springs and fountains whose precious waters give life to the fruits and flowers, orchards, parks and pleasure grounds which enter into the oriental conception of Paradise. Where no running stream exists they depend for life upon capacious cisterns which "drink water from the rain of heaven." They are always carefully inclosed and protected by hedges, walls and ditches, and the traveler is surprised amid the heat and glare of the Syrian sun to enter their pleasant pathways and find retired and shady nooks under embowering greenery. Their secluded recesses have always been a favorite resort for purposes of devotion. They are often the gathering place of families and friends and the token of peace and security is when a man may sit in safety under his own vine and fig tree.—Christian Herald.

Thrice-a-Week Edition OF THE NEW YORK WORLD

Practically a Daily at the Price of a Weekly. No other Newspaper in the world gives so much at so low a price.

The year 1914 has been the most extraordinary in the history of modern times. It has witnessed the outbreak of the great European war, a struggle so titanic that it makes all others look small.

You live in momentous times, and you should not miss any of the tremendous events that are occurring. No other newspaper will inform you with the promptness and cheapness of the Thrice-a-Week edition of the New York World. Moreover, a year's subscription to it will take you far into our next Presidential campaign.

THE THRICE-A-WEEK WORLD'S regular subscription price is only \$1.00 per year, and this pays for 156 papers. We offer this unequalled newspaper and NEWS AND CITIZEN together for one year for \$2.00. The regular subscription price of the two papers is \$2.25.
